

# Eco-Friendly Cleaning Recipes

This guide provides recipes for creating natural cleaning products at home. These homemade solutions promote environmental safety and personal health.

## Step 1: **Ingredients**

Gather natural ingredients such as white vinegar, baking soda, lemon juice, essential oils, and castile soap.

## Step 2: **All-Purpose Cleaner**

Combine 1 part water, 1 part white vinegar, and a few drops of essential oil in a spray bottle for a general cleaning solution.

## Step 3: **Glass Cleaner**

Mix 2 cups of water, 2 tablespoons of white vinegar, 2 tablespoons of rubbing alcohol, and 5 drops of peppermint essential oil in a spray bottle for a streak-free shine.

## Step 4: **Disinfectant**

Create a disinfecting solution by combining 2 cups of water, 3 tablespoons of liquid castile soap, and 20-30 drops of tea tree essential oil in a spray bottle.

## Step 5: **Scrubbing Paste**

Form a paste for tough grime by mixing ½ cup of baking soda with enough liquid castile soap to form a paste, then add 10 drops of lemon essential oil.

## Step 6: **Floor Cleaner**

Prepare a floor cleaning solution by mixing 1 gallon of hot water, 2 tablespoons of liquid castile soap, and 5-10 drops of your favorite essential oil.

## Step 7: **Storage & Use**

Store the home-made cleaners in labeled spray bottles or jars. Shake well before each use and test a small area when using a new cleaner for the first time.

# **General Notes**

## **Precaution**

Always label your homemade products and store them out of reach of children and pets. Even natural ingredients can be harmful if ingested in large quantities or used improperly.

## **Customization**

Feel free to experiment with different essential oils for fragrance and additional antibacterial properties based on personal preference and intended use.
